

North Dakota Energy Codes Collaborative

Join the Midwest Energy Efficiency Alliance (MEEA), the North Dakota Department of Commerce, Division of Community Services, and other stakeholders to collaborate and discuss energy code adoption and compliance solutions.

What is the purpose of the North Dakota Codes Collaborative?

The Collaborative facilitates energy code compliance by establishing a cooperative network between all construction industry stakeholders, creating informational resources for the building industry, and educating the public on the importance and benefits of energy codes. The Collaborative serves as a neutral, open forum to foster a collaborative effort to improve energy code compliance.

How it works:

The Collaborative works together to identify collective priorities and establish goals. Priorities and goals include:

- Overcoming enforcement barriers through statewide collaboration
- Understanding updated codes and adoption processes
- Creating energy code resources for the building industry and public

The Collaborative meets quarterly virtually and in-person as appropriate. We would greatly appreciate your participation. The upcoming meeting will take place in a **virtual format** on **Tuesday, June 16th, from 9 – 11 A.M.**

June Speaker Highlight:

Paula Zimin is a Registered Architect and Senior Research Analyst with PNNL's Building Energy Codes Program, where she supports national efforts to develop, adopt, and implement building energy codes that deliver practical, cost-effective improvements in building construction. She works closely with states, jurisdictions, and industry partners to provide technical assistance, engage in model code development, and help ensure that updated codes result in meaningful energy savings and healthy, resilient buildings for communities nationwide.
