

City of West Fargo
2024 Spring Stormwater Update

To all contractors/builders working in West Fargo:

The City of West Fargo would like to remind contractors and builders that all stormwater controls should now be in place. This includes all inlet protection (street and interior), perimeter controls (wattles or silt fence), construction entrances, concrete washouts and material storage areas.

All sediment, class 5, rock or other building materials must be removed from the street and the curblines maintained and cleaned. Large sediment/mud chunks that get tracked into the roadway must be cleaned up immediately. All smaller sediment/mud must be removed by the end of the day.

Please pick up any garbage that has been left on site over the winter and please remind all workers to follow West Fargo's parking restrictions and spring road restrictions.

Any questions or comments please visit the stormwater webpage or call the Public Works Department at (701) 515 – 5400.

Thank you!

Sincerely,

A handwritten signature in black ink that reads "Chad Zander". The signature is written in a cursive, flowing style.
