

SANITARY SEWER SERVICE INSTALLATION
MAY 25, 2022

The following recommendations relate to all sanitary sewer service installations for new building construction with cleanouts previously installed under City construction projects:

- 1. Where possible, City staff will televise and inspect the condition of existing cleanouts upon receipt of a building permit application.
- 2. Sanitary sewer services may be installed, at the contractor's discretion, using any method compliant with the applicable building codes.
- 3. Previously installed cleanouts may be removed and replaced with a locator pipe in accordance with the recommendations below.

RECOMMENDED SEWER SERVICE INSTALLATION METHOD #1
NOT TO SCALE

RECOMMENDED SEWER SERVICE INSTALLATION METHOD #2
